## 2. Extend the bracket

4. Fix bracket to the wall using the holes provided in the bracket to complete installation.

PS: Please check and make sure connecting screws should be tightened on the bracket after finished installation

- Note:
1. Ensure that the wall bracket is mounted properly to handle applied loads as wall construction may vary.
  2. The wall bracket must be securely fixed to wall with all screws fastened tightly.
  3. Do not make any modification to bracket assembly or fixings
  4. The picture is for reference only, Product should base on real object.
